

Understanding and Supporting Learning

Course Objectives for The Number Box Training

Awareness

To develop an awareness of specific learning disorders that create a barrier to learning maths.

Rationale:

To understand how the Number Box meets the learning needs of pupils struggling to learn maths.

To examine how the Number Box meets the requirements of the Code of Practice 2014 and to see it as an inclusive learning tool which provides an easily managed intervention?

Hands on Experience

To examine the content of the Number Box including the concrete manipulatives, teaching manual and evaluation sheets.

To learn how to teach a variety of maths lessons using the Number Box, modelled by a specialist teacher, and to show confidence in delivering it independently.
